SUMMARY

Web Developer, experienced in HTML, CSS, Bootstrap, and JavaScript seeking a full time position to gain further experience in building applications, learning new technologies and collaborate with others in the field.

PROJECTS

NuCampsite: Website for a mock campsite

- Built with HTML, CSS, Bootstrap, & jQuery
- Created a visually appealing and responsive website with the following features:
- Carousel that included indicators to view several images of campsites.
- Easily accessible navigation for a quality user experience.
- A modal for users to enter their login credentials.
- Utilized cards and forms to create a reservation box for users to make their campsite reservations.

Journal Fit: Website for assisted workout logging for users on their fitness journey (Under construction)

- Using HTML, CSS, Bootstrap, & jQuery
- Utilizing cards, buttons, and forms to create an easy user experience.
- Bold and modern design yet to be seen in fitness web applications.
